

PVC DIDGERIDOO

Supplies

- 5-6 feet of 1 ½ inch PVC (or adjust diameter to fit your mouth)
- (1) 1 ½ inch coupler piece
- (1) 1 ½ inch to 1 inch bushing

Optional

- Rust-oleum 2X spray paint (must bond to plas-

Directions

1. Cut 5- 6 feet of the 1 ½ inch PVC. if the diameter is too big to form an airtight seal around your lips, then try going down ¼ of an inch at a time until you find a diameter that works best for you. *The longer the PVC, the lower the tone of the didgeridoo. The shorter the tube, the higher the tone.*
2. Remove any PVC dust from cutting with a razor, to create a clean edge.
3. Clean the PVC well and remove and dust or dirt.
4. Let dry, then if desired, spray evenly with spray paint, you can spray the coupler and bushing pieces as well or leave them white. Allow adequate time for drying.
5. Once dry, you can paint over the primer with acrylics or add more layers of spray paint to personalize it further.
6. Slip the bushing into the coupler, and the coupler onto your PVC tube, and you are done!
