

Dog Collar & Leash

Supplies

Leash

- 7' x 1" nylon webbing
- 1 swivel bolt snap
- 4 small speed rivets

Collar

- 2' x 1" nylon webbing (this will accommodate pet neck sizes from 13½" to 20½")
- (1) 1" single-sided stealth buckle
- (1) 1" sliplok
- (1) 1" metal D-ring
- 4 small speed rivets

Directions

1. Lightly burn ends of nylon webbing to stop fraying.
2. **For the collar**, thread webbing through left side of 1" sliplok. Fold over and tape together. Thread end through the 3-pronged end of the stealth buckle. Thread back through sliplok starting from bottom (underneath taped section) and thread up through raised middle and back down through the other side. Next thread on the 1" D-ring then thread same end through the other side of the stealth buckle, fold over and tape.
3. **For the leash**, thread one end of 7' nylon webbing through the fixed side of the bolt snap. Fold over and tape together. Create handle by taking other end of webbing, fold 6" back onto itself and tape together.
4. Apply two rivets to each of the taped sections of the collar and leash. If you are not comfortable riveting on your own, our Shop Services can apply them for you for a nominal charge.
