

# FRUIT FLY TRAP

## Homemade Fruit Fly Trap

### Supplies

1 plastic soda bottle

1 32oz bottle Apple Cider Vinegar or Distilled White Vinegar

Few drops of dish soap

### Instructions

Wash out old soda bottle well and let dry thoroughly. Cut bottle roughly in half with scissors, leaving a little more length to the bottom of the bottle.

Fill the bottom of the plastic bottle about 1/3 of the way full with vinegar. Then add a few drops of dish soap.

Take the top of the plastic bottle you just cut off and turn it upside down so that the mouth points downward and into the other half of bottle. Tape top edges together.
